

# IT TOOK A PANDEMIC TO REALIZE THE VALUE OF INFECTION CONTROL

*The need for proper infection control and isolation measures at medical facilities across the globe has never been higher than today. Having a secure place to store PPE for your hard-working staff is vital. Harloff isolation carts typically feature deep drawers and removable antimicrobial tops. Multiple sizes, configurations and colors of carts are available although most come in a yellow color indicative of isolation areas.*

## ISOLATION CARTS

***Isolation carts, also referred to as infection control carts, are intended to help prevent the spread of infectious illness and disease within a healthcare setting. Storage solutions for PPE supplies help to reduce the risk of pathogen transmission between patients, healthcare workers and visitors.***

***Stopping the spread of VREs, MRSAs and other infectious microbes can help save hospitals millions of dollars as well as improve patient outcomes. Our carts help lower hospital costs and liability by limiting the number of healthcare acquired infections.***

# INFECTION CONTROL CARTS

## MDS2424E05

Replaces  
the 4245E

Formerly called the Mini24, this cart with 18.5" wide drawers is a happy medium between the full width cart and the minis. Includes full extension drawer slides, fully curved protective bumpers, an anti-microbial plastic top and an electronic pushbutton lock with key lock override.

## M3DSI830K04-PPE

This four drawer, key locking PPE cart has ample storage for face shields, masks, medical gloves, gowns and footwear plus it comes with a Sani-Wipe holder and triple glove box holder. It uses one of our most popular cart bodies.

## M3DSI830K04-VC

This vaccine cart comes with four drawers of dry storage for vaccine preparation, along with a triple glove box holder and sharps container for syringes. This is a great solution for vaccination efforts that don't require cold storage.

## MDS1830K06+MD18-PHB

Replaces  
the 3256KPB

This phlebotomy cart has 30" of vertical drawer space secured with either a key or latch lock and it comes with two 6-compartment tilt bins, a raised back rail, a waste container, a single glove box holder and extended push handle. Phlebotomy carts keep your supplies nearby, are mobile, provide a dedicated work surface for procedures and allow quick disposal of used needles.

## INFECTION CONTROL CARTS

Replaces  
the AL3244K

## MPA1824K04

This narrow lightweight aluminum cart offers 24" of vertical drawer space, secured by a standard key lock with two keys. Features premium 5" Tente® casters, a white antimicrobial plastic top, new full-extension self-closing drawer slides and a fully-curved protective bumper.

Replaces  
the 3154K

## M3DS1830K04

One of our top-selling items during the pandemic, this cart combines premium PPE storage abilities with a small footprint in one economical package. Comes with a key lock, 3" single wheel stem casters and 30" of vertical drawer space.

## 3123

The IV Start Cart is designed to reduce the risk of accidental needle sticks to patients and staff while improving the efficiency of IV and epidural procedures. Features a dual work surface, articulating arm, waste container and Sharps container. Comes with either a latch or key lock to secure the four full extension drawers.

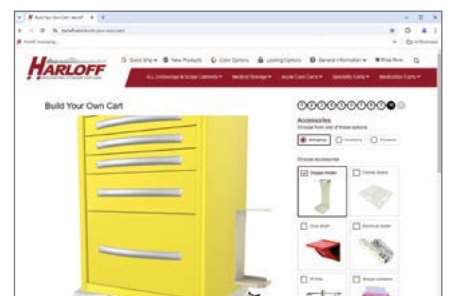

## MPA2430EKC16

This lightweight aluminum cart has a highly secure electronic keypad lock plus a six drawer configuration for maximum storage. All A-Series carts include 5" premium casters, pontoon bumpers and self-closing drawer slides.
