

MALIGNANT HYPERTHERMIA CARTS

Meet AANA and MHAUS recommendations to have the right supplies organized and quickly available. SMS's MH Carts provide portable storage with easy access.

Signs of malignant hyperthermia are often not apparent until anesthesia drugs have already been administered, and this condition can be fatal if not treated promptly. Medication and ice packs are used in the immediate treatment of malignant hyperthermia, so having a dedicated MH cart nearby significantly improves medical response time.

SMS-04-V68-MH5200B-AC

Includes a built-in 2.4 cubic feet Accucold® laboratory grade refrigerator for storage of cold saline solutions and regular insulin. Comes with a breakaway lock and two drawers. Accessories include a waste container, two chart/document holders and a large wire basket.

SMS-04-V68-MH4216K-AC

Equipped with an Accucold® 1.0 cubic feet medical-grade refrigerator, two storage drawers are available for Dantrolene and other supplies.

STORE YOUR MEDICATIONS AND INSULIN IN A MEDICAL-GRADE REFRIGERATOR

SMS malignant hyperthermia carts are the perfect solution for holding your Dantrolene and other medical supplies while keeping insulin, saline and ice packs cold inside a lab-quality Follett® or Accucold® refrigerator. MH carts are offered with two different sizes of refrigerator along with multiple drawer configuration options. SMS offers a wide range of accessory options to further equip your MH cart, or purchase one of our Malignant Hyperthermia cart packages featuring our most common accessories.

SMS-04-V68-MDS2430B02-MH1

We combined an M-Series body with a 1.0 cubic feet Accucold® refrigerator. Includes most M-Series features such as premium casters and bumpers, pre-drilled accessory mounting holes and full extension drawer slides.

SMS-04-V68-MH5200B

Our most popular selling MH cart, the MH5200B combines the perfect balance of cold storage with two drawers of top storage. Comes with the accessories you need to create a fully equipped MH cart.

SMS-04-V68-MH5216K

Our standard cart features a 1.8 cubic feet Follett® medical-grade refrigerator. This key locking model features a smaller 1.0 cubic feet Follett® refrigerator to offer more top drawer space. Other features include a waste container with mounting brackets, two large chart/document holders and a large wire basket.

SMS-04-V68-MH5300B

Features three top drawers with a break-away bar for quick access to both room temperature and refrigerated medications, along with accessories.

SMS-04-V68-MH5100B

Our shortest Malignant Hyperthermia cart has a single top drawer with breakaway bar, ample refrigerated storage, a full complement of accessories and an antimicrobial plastic top.

SMS-04-V68-MH4300K

For those who don't need accessories or wish to purchase their own accessories separately, this three drawer, key locking cart is the lean version of our MH carts.
