

SPECIFICATION GUIDE

Sterile Processing Surgical Vertical Carousel

- Ideal for sterile processing departments in healthcare facilities
- Accelerates access to instrument sets, achieving 3-4x faster retrieval times
- Maximizes storage capacity, utilizing vertical space for 4x more storage
- Interfaces with surgical scheduling software for precision and reduced errors

Description

The Sterile-Processing Surgical Set Vertical Carousel is a cutting-edge storage solution designed specifically for healthcare facilities seeking to optimize their sterile processing departments

(SPD). This vertical carousel dramatically accelerates access to surgical instrument sets, enabling SPD teams to retrieve items 3-4 times faster than traditional methods.
