

DETENTION BENCH INSTALLATION RECOMMENDATIONS:

Due to the weight and security considerations, mounting to concrete, stone, or other similar solid surfaces with tamper resistant 3/8" x 1 1/2" long minimum concrete bolts & anchors are recommended for secure installation.

Use detention bench floor flange as a template to locate and mark holes for the anchors.

Consult local and national accessibility codes for proper installation guidelines.

Conformity and compliance to local and national codes is the responsibility of the installer.

Detention bench is only as strong as the anchoring devices and the floor on which it is mounted too.
