

# FRAME KEY CONTROL SYSTEM

Advanced Secure Key Control with Elegant,  
Space-Saving Design

## WHY FRAME KEY CONTROL SYSTEMS?

Frame Key Control System is a new generation of secured key control designed to deliver maximum protection, visibility, and control in a sleek, wall-mounted format. Available in FRAME MINI, FRAME, and FRAME EXTRA configurations, this system secures each key in an individually sealed, electronically locked compartment—eliminating the risks associated with traditional key cabinets. Every transaction is video recorded, fully traceable, and controlled through advanced software that provides real-time alerts and reporting. With a 10.1" touchscreen panel and built-in voice guidance, SMS makes high-security key management simple and intuitive.

A NEW  
GENERATION  
OF SECURE  
KEY  
CONTROL  
SYSTEMS
