Technical Specifications

Warranty	2-Year Manufacturer's Limited Warranty
Availability	Ships in 1-3 business days
Assembly	Assembled; installation may be required
Product Weight	1 lbs
Quantity Included	6 filters
Compatible Model	ProGuard DXB Mini 1x6452
Replacement Interval	Every 3-4 months or between harvests
Filter Type	Nano-fiber replacement filter

Product Overview

These replacement filters give ProGuard DXB Mini owners a convenient supply for routine maintenance. Each nano-fiber filter captures dust, mold spores, and other particles before they enter the unit, helping protect the internal sanitization cell and preserve airflow. The DXB Mini uses one filter at a time, so the six-pack provides six complete changes for a single unit. Replace the filter every 3-4 months or between harvests, adjusting the schedule when facility conditions create heavier particle buildup.

The filters are made for ProGuard DXB Mini model 1x6452. Key Features: Six Complete Changes: Includes six filters, with one filter required per DXB Mini service. Nano-Fiber Construction: Helps keep dust and airborne particles away from internal components. Confirmed Compatibility: Fits ProGuard DXB Mini model 1x6452. Easy Maintenance Planning: A multi-pack keeps replacements available for scheduled service.

3-4 Month Interval: Supports the manufacturer-recommended replacement schedule or between-harvest maintenance. Regular filter changes are a straightforward way to support reliable DXB Mini operation and avoid reduced airflow caused by a loaded filter.
