ProGuard DXB 100 Replacement Filters - 12 Pack

Product Identification

Product	ProGuard DXB 100 Replacement Filters - 12 Pack
StoreMoreStore SKU	SMS-895-V171-1X6728
Manufacturer Part Number	1x6728

Technical Specifications

Warranty	2-Year Manufacturer's Limited Warranty
Availability	Ships in 1-3 business days
Assembly	Assembled; installation may be required
Product Weight	1 lbs
Quantity Included	12 filters
Compatible Model	ProGuard DXB 100 1x5784
Replacement Interval	Every 3-4 months or between harvests
Filter Type	Nano-fiber replacement filter

Product Overview

Routine filter changes help the ProGuard DXB 100 maintain steady airflow while shielding its internal ARC-PCO cell from dust, mold spores, and other airborne particles. This 12-pack supplies six complete filter changes because the DXB 100 uses two filters at a time. Keeping a full pack on hand lets cultivation, drying, and processing facilities service the unit on schedule without waiting for replacement supplies.

Install a fresh pair every 3-4 months or between harvests, with more frequent checks in dusty or demanding environments. These nano-fiber filters are intended for the ProGuard DXB 100, model 1x5784. Key Features: 12 Filters Included: Provides six complete two-filter changes for one DXB 100 unit. Nano-Fiber Media: Captures particles before they reach the sanitization cell and internal components. Model-Specific Fit: Designed for ProGuard DXB 100 model 1x5784.

Practical Maintenance Supply: Supports scheduled service across multiple grow or production cycles. Recommended Service Interval: Replace every 3-4 months or between harvests based on facility conditions. A ready supply of clean filters makes routine DXB 100 maintenance simple and helps the system continue moving air as intended throughout the operating cycle.
