

Order Picker Platform | Adjustable

These best selling **Order Picker Platforms** offer many advantages to distribution centers, including improving the efficiency and most importantly, the safety of employees in a vertical environment.

- Carts are available with either two or three adjustable shelves, equipped with thumb screws; users can easily reposition, add, or remove shelves—no tools required.
 - Adjustable centers are spaced every four inches for maximum versatility!
- Shelves are sloped “back” towards the amplimesh sides; product stays on the cart during loading and transport.
- Universal fork pocket for easy entry, equipped with an anti-tip bracket and replaceable oakwood clamp block. Providing a safe, secure connection.
