Turnout Locker with Non-Locking Drawer Base - 18" W x 18" D x 78" H

Product Identification

Product	Turnout Locker with Non-Locking Drawer Base - 18" W x 18" D x 78" H
StoreMoreStore SKU	SMS-111-V25-WL-TL-K1-187818
Manufacturer Part Number	WL-TL-K1-187818

Technical Specifications

Product Width	18"
Product Depth	18"
Gauge	18-gauge welded steel frame
Product Height	78"
Warranty	Limited lifetime warranty for original purchaser. Certified installation and proof of purchase are required; qualifying replacement parts are covered
Availability	4 - 5 weeks
Material	Steel
Color/Finish	Choice of 15 Standard Paint Colors
Assembly	Requires locker to base assembly
Product Weight	128 lbs
Country of Origin	USA

Product Overview

This full-height turnout locker with an integrated non-locking drawer base gives fire stations and emergency response facilities a dedicated, organized storage solution for turnout gear and personal equipment. Standing 78" tall on an 18" W x 18" D footprint, it makes efficient use of limited floor space while providing the vertical clearance needed to organize coats, pants, boots, and other essential gear without crowding.

Built from 18-gauge welded steel with a durable powder-coated finish, this locker is designed for the daily demands of a working firehouse. The non-locking drawer base adds accessible lower storage for smaller items, keeping gear organized and ready for a fast response without requiring a separate key or combination. The locker ships as two components - the locker body and

drawer base - and requires locker-to-base assembly on site. Once assembled, leveling glides help stabilize the unit on uneven floors.

The 1" slotted uprights support flexible positioning of compatible interior accessories. A choice of 15 standard paint colors allows facilities to coordinate the locker with existing interiors or color-code storage areas by crew or shift. This unit is well suited for fire stations, EMS facilities, and public safety departments that need reliable, purpose-built gear storage in a compact format.

Key Features: 18-Gauge Welded Steel Frame: Heavy-gauge steel construction withstands the daily wear of an active station environment and supports long-term durability. Non-Locking Drawer Base: Provides quick-access lower storage for smaller gear items without requiring a key or combination. Powder-Coated Finish: Protects the steel surface and helps maintain a clean appearance through regular use. 1" Slotted Uprights: Support flexible positioning of compatible interior accessories for organized gear storage.

Leveling Glides: Adjust to compensate for uneven floors, helping keep the assembled unit stable and upright. **Choice of 15 Standard Paint Colors:** Select from 15 available colors to coordinate with facility interiors or differentiate storage by crew or assignment. This 18" W x 18" D x 78" H steel turnout locker with a non-locking drawer base provides a practical, space-efficient storage solution for fire and emergency services facilities.

Its welded steel construction, powder-coated finish, and accessible drawer base support organized, ready-to-go gear storage within a compact footprint. Assembly of the locker body to the drawer base is required, and leveling glides are included to simplify final placement.
