Turnout Locker with Key-Locking Drawer Base - 18" W x 24" D x 78" H - Steel

Product Identification

Product	Turnout Locker with Key-Locking Drawer Base - 18" W x 24" D x 78" H - Steel
StoreMoreStore SKU	SMS-111-V25-WL-TL-K1-187824-K
Manufacturer Part Number	WL-TL-K1-187824-K

Technical Specifications

Product Width	18"
Product Depth	24"
Product Height	78"
Warranty	Lifetime warranty
Availability	4 - 5 weeks
Frame Construction	18-gauge welded steel frame
Upright Slots	1" slotted uprights
Leveling	Leveling glides included
Drawer Base	Key-locking louvered drawer base
Material	Steel
Color/Finish	Choice of 15 Standard Paint Colors
Assembly	Requires locker to base assembly
Product Weight	151 lbs
Country of Origin	USA

Product Overview

This open-front turnout locker with a key-locking drawer base provides organized storage for protective clothing, uniforms, gear, and personal equipment in public safety, emergency response, industrial, institutional, and other demanding facilities. The upper compartment includes a full-width shelf for helmets, folded items, or supplies and one garment hanging rod for coats,

uniforms, and other clothing.

The lower key-locking louvered drawer creates a separate, controlled-access space for personal belongings, tools, and smaller items. Measuring 18" W x 24" D x 78" H, the locker provides a deeper storage profile and additional vertical space for bulky equipment while retaining a relatively narrow footprint. Its reinforced top and bottom and 18-gauge welded steel frame support regular use in active facilities.

One-inch slotted uprights provide flexibility for positioning compatible interior components, while leveling glides help stabilize the locker on floors with minor surface irregularities. The locker requires locker-to-base assembly on site. A choice of 15 paint colors allows the finish to coordinate with other equipment or facility standards. Key Features: Open-Front Gear Storage: Keeps frequently used clothing and equipment visible and readily accessible.

Key-Locking Louvered Drawer Base: Provides separate, controlled-access storage for personal belongings, tools, and smaller items. The key lock secures the lower drawer only; the upper gear compartment remains open. Full-Width Shelf: Provides overhead storage for helmets, folded clothing, supplies, or other gear. Garment Hanging Rod: Accommodates coats, uniforms, protective clothing, and other hanging items. 24" Overall Depth: Provides a deeper storage profile for organizing bulky clothing and equipment.

78" Overall Height: Provides additional vertical space for hanging clothing and other gear. 18-Gauge Welded Steel Frame: Provides durable support for regular use in demanding gear-storage environments. Reinforced Top and Bottom: Add strength to the locker structure for long-term facility use. 1-Inch Slotted Uprights: Support flexible positioning of compatible interior components. Leveling Glides: Help keep the locker stable on floors with minor surface irregularities.

Choice of 15 Paint Colors: Offers multiple finish options for coordinating with existing equipment or facility standards.

Locker-to-Base Assembly Required: The locker must be connected to the drawer base on site. This turnout locker combines accessible open storage with a separate key-locking drawer for items requiring controlled access.

Its deeper and taller profile, full-width shelf, garment rod, welded steel construction, and narrow 18" W footprint make it a versatile gear-storage solution for a wide range of facilities. The locker is made in the USA and backed by a lifetime warranty.
