Turnout Locker - 18"W x 24"D x 60"H - 18-Gauge Welded Steel

Product Identification

Product	Turnout Locker - 18"W x 24"D x 60"H - 18-Gauge Welded Steel
StoreMoreStore SKU	SMS-111-V25-WL-TL-K2-186024
Manufacturer Part Number	WL-TL-K2-186024

Technical Specifications

Product Width	18"
Product Depth	24"
Product Height	60"
Warranty	Limited lifetime warranty for the original purchaser while it owns and possesses the product, when installation is completed by a Certified Installer and proof of purchase is provided. Qualifying replacement parts are supplied for the product
Availability	4 - 5 weeks
Material	Steel
Gauge	18-gauge
Color/Finish	Choice of Standard Paint Colors
Assembly	Assembled
Leveling Glides	Included
Upright Slots	1-inch slotted uprights
Product Weight	93 lbs
Country of Origin	USA

Product Overview

Turnout lockers give first responders and public safety personnel a dedicated, organized space to store and access their gear quickly when every second counts. This 18"W x 24"D x 60"H unit is built from welded 18-gauge steel and ships fully assembled, so it is ready to put to work without on-site fabrication. The generous 24-inch depth accommodates bulky turnout gear, helmets,

and boots in a single compartment, while the 60-inch height keeps everything upright and accessible.

A powder-coated finish resists wear in demanding station environments, and the choice of standard paint colors lets the locker coordinate with existing station furnishings or color-coding systems. The 1-inch slotted uprights provide flexibility for configuring interior accessories as storage needs change over time, and the included leveling glides keep the unit stable on uneven floors common in older fire stations and public safety facilities.

This locker fits naturally into fire station gear rooms, emergency services facilities, and any workplace where personnel need a secure, clearly assigned space for personal protective equipment. The assembled delivery eliminates setup labor, making it a practical choice for facilities adding capacity or replacing aging storage. At 93 lbs, the unit is substantial enough to stand firm under daily use while remaining manageable for placement and repositioning during facility reconfigurations.

Key Features: **Welded 18-Gauge Steel Construction:** Heavy-gauge welded steel provides a rigid, long-lasting frame that holds up to the demands of daily gear storage in active facilities. **Generous 18"W x 24"D x 60"H Footprint:** The 24-inch depth and 60-inch height accommodate full-length turnout gear, helmets, and boots without folding or compressing equipment. **Ships Fully Assembled:** Arrives ready to use with no on-site assembly required, saving setup time and reducing installation labor.

Powder-Coated Finish in Choice of Standard Colors: A durable powder-coat protects the steel surface and allows color coordination with existing station storage or department color systems. **1-Inch Slotted Uprights:** Slotted uprights support interior accessory configurations, allowing the locker to adapt as storage requirements change. **Leveling Glides Included:** Adjustable leveling glides keep the unit stable and level on uneven or older station floors.

This turnout locker is a practical, durable storage solution for fire stations, emergency services facilities, and public safety environments where organized, accessible gear storage directly supports operational readiness. The welded steel frame, assembled delivery, and configurable interior make it a dependable long-term addition to any gear room.
