Turnout Locker - 18"W x 18"D x 72"H - 18-Gauge Welded Steel

Product Identification

Product	Turnout Locker - 18"W x 18"D x 72"H - 18-Gauge Welded Steel
StoreMoreStore SKU	SMS-111-V25-WL-TL-K2-187218
Manufacturer Part Number	WL-TL-K2-187218

Technical Specifications

Product Width	18"
Product Depth	18"
Product Height	72"
Warranty	Limited lifetime warranty for the original purchaser while it owns and possesses the product, when installation is completed by a Certified Installer and proof of purchase is provided. Qualifying replacement parts are supplied for the product
Availability	4 - 5 weeks
Material	Steel
Gauge	18-gauge
Color/Finish	Choice of Standard Paint Colors
Assembly	Assembled
Leveling Glides	Included
Upright Slots	1-inch slotted uprights
Product Weight	95 lbs
Country of Origin	USA

Product Overview

Turnout lockers give fire stations, EMS facilities, and emergency-response teams a dedicated, organized home for bulky turnout gear and personal protective equipment. This full-height unit stands 72"H and offers an 18"W x 18"D footprint that fits neatly into apparatus bays, gear rooms, and locker corridors without consuming excessive floor space.

The welded 18-gauge steel frame delivers the structural rigidity needed to support heavy gear day after day, while the powder-coated finish resists the scuffs and moisture that come with active-duty environments. The locker ships fully assembled, so installation is straightforward and your team can put it to work quickly. Leveling glides allow the unit to sit stable on uneven concrete floors, and 1-inch slotted uprights provide flexibility for configuring interior accessories to match your storage needs.

This locker is well suited for fire stations, emergency services facilities, and public-safety departments that need reliable, purpose-built storage for turnout gear. The full-height 72" profile accommodates coats, pants, boots, and helmets in a single organized station, reducing the time spent locating equipment before a call. The choice of standard paint colors lets facilities coordinate with existing cabinetry or room finishes.

Because the unit arrives assembled, there is no on-site fabrication required, making it a practical choice for facilities adding stations incrementally or outfitting a new bay. Key Features: 18-Gauge Welded Steel Frame: Heavy-duty construction stands up to the demands of active emergency-services environments and supports the weight of full turnout gear sets. Full-Height 72" Profile: Accommodates coats, pants, boots, and helmets in one organized station, keeping all gear together and ready for rapid deployment.

Powder-Coated Finish: Provides a durable, moisture-resistant surface that holds up in apparatus bays and gear rooms where conditions can be harsh. 1-Inch Slotted Uprights: Allow interior accessories and dividers to be positioned where they are most useful, adapting the locker to different gear configurations. Leveling Glides Included: Keep the unit stable on uneven or sloped concrete floors without shimming or additional hardware.

Ships Fully Assembled: Eliminates on-site assembly time so the locker is ready to use immediately upon delivery. This 18"W x 18"D x 72"H steel turnout locker is a practical, purpose-built storage solution for emergency-services facilities that need organized, accessible gear storage. The welded steel construction, powder-coated finish, and included leveling glides combine to deliver a unit that is ready for the demands of daily use in fire stations and similar environments.
