Turnout Locker - 24"W x 18"D x 66"H - 18-Gauge Welded Steel

Product Identification

Product	Turnout Locker - 24"W x 18"D x 66"H - 18-Gauge Welded Steel
StoreMoreStore SKU	SMS-111-V25-WL-TL-K2-246618
Manufacturer Part Number	WL-TL-K2-246618

Technical Specifications

Product Width	24"
Product Depth	18"
Product Height	66"
Warranty	Limited lifetime warranty for the original purchaser while it owns and possesses the product, when installation is completed by a Certified Installer and proof of purchase is provided. Qualifying replacement parts are supplied for the product
Availability	4 - 5 weeks
Material	Steel
Gauge	18-gauge
Color/Finish	Choice of Standard Paint Colors
Assembly	Assembled
Leveling Glides	Included
Upright Slots	1-inch slotted uprights
Product Weight	100 lbs
Country of Origin	USA

Product Overview

This steel turnout locker gives fire stations and emergency response facilities a dedicated, organized storage solution for bulky turnout gear, helmets, boots, and personal equipment. At 24"W x 18"D x 66"H, it provides a full-height compartment that keeps gear off the floor, ready for rapid deployment, and protected between calls. Built from 18-gauge welded steel with a durable

powder-coated finish, this locker arrives fully assembled so it can be placed into service without on-site fabrication.

Leveling glides allow it to sit securely on uneven floors, and 1-inch slotted uprights offer flexibility for configuring interior accessories to match the storage needs of individual users. Turnout lockers like this one are a practical fit for fire stations, emergency services facilities, and public safety departments where gear must be stored accessibly, kept in good condition, and accounted for at a glance.

The full-height 66" profile accommodates hanging coats and pants while leaving room for helmets, boots, and personal equipment below. The assembled construction means installation is straightforward, and the choice of standard paint colors allows the locker to coordinate with existing station interiors or color-coded assignment systems.

Key Features: 18-Gauge Welded Steel Frame: Heavy-gauge construction provides the structural rigidity needed to support the weight of full turnout gear and withstand the demands of a working fire station environment. Powder-Coated Finish: A durable powder-coat protects the steel surface against moisture, abrasion, and daily wear, helping the locker maintain its appearance over years of use.

Full-Height 66" Profile: The tall compartment accommodates hanging coats and pants at full length alongside boots, helmets, and accessories, keeping all gear organized in one dedicated space. **1-Inch Slotted Uprights:** Slotted uprights allow interior components and accessories to be positioned at the heights that work best for each user's gear configuration. **Leveling Glides Included:** Adjustable leveling glides compensate for uneven floors so the locker stands stable and plumb without shimming or modification.

Arrives Fully Assembled: Factory assembly eliminates on-site build time, allowing the locker to be placed and put into use immediately upon delivery. This 24"W x 18"D x 66"H steel turnout locker is a practical, ready-to-use storage solution for fire stations and emergency services facilities that need reliable, organized gear storage. Its welded steel construction, powder-coated finish, and included leveling glides make it a durable long-term addition to any apparatus bay or gear room.
