

Product Specification Sheet

Turnout Locker - 24"W x 24"D x 66"H - 18-Gauge Welded Steel

Product Identification

Product	Turnout Locker - 24"W x 24"D x 66"H - 18-Gauge Welded Steel
StoreMoreStore SKU	SMS-111-V25-WL-TL-K2-246624
Manufacturer Part Number	WL-TL-K2-246624

Technical Specifications

Product Width	24"
Product Depth	24"
Product Height	66"
Warranty	Limited lifetime warranty for the original purchaser while it owns and possesses the product, when installation is completed by a Certified Installer and proof of purchase is provided. Qualifying replacement parts are supplied for the product
Availability	4 - 5 weeks
Material	Steel
Gauge	18-gauge
Color/Finish	Choice of Standard Paint Colors
Assembly	Assembled
Leveling Glides	Included
Upright Slots	1-inch slotted uprights
Product Weight	113 lbs
Country of Origin	USA

Product Overview

Turnout lockers give fire stations, emergency services facilities, and public safety departments a dedicated, organized storage point for bulky turnout gear and personal protective equipment. This locker is built from welded 18-gauge steel and arrives fully assembled, so it is ready to put into service without on-site fabrication.

At 24"W x 24"D x 66"H, it provides a full-height storage column that keeps gear off the floor, reduces clutter in gear rooms, and helps extend the life of protective equipment by allowing it to hang and air out properly. The powder-coated finish resists everyday wear in demanding environments, and leveling glides let you set the unit securely on uneven floors. A choice of standard paint colors means the locker can coordinate with existing facility finishes or department color standards.

This locker fits naturally into gear rooms, apparatus bays, and locker corridors where turnout equipment needs a consistent, assigned home. The 1-inch slotted uprights allow accessories or hooks to be positioned where they are most useful, supporting a workflow where gear can be donned quickly and returned to the same spot after every call. Because the unit ships assembled, installation is straightforward and does not require extended setup time.

Key Features: **Welded 18-Gauge Steel Construction:** Heavy-gauge welded steel provides a rigid, long-lasting frame that holds up to the daily demands of public safety environments. **Full-Height 66" Profile:** The 66"H column accommodates full-length turnout coats, pants, and other tall gear items, keeping everything contained in one organized space.

Powder-Coated Finish: A durable powder-coat protects the steel surface from scratches and corrosion and is available in a choice of standard paint colors to match facility requirements. **1-Inch Slotted Uprights:** Slotted uprights allow hooks and accessories to be positioned at the heights that work best for each user or gear type. **Leveling Glides Included:** Built-in leveling glides let the locker sit flat and stable on floors that are not perfectly level, eliminating rocking without shimming.

Ships Fully Assembled: The locker arrives ready to place and use, reducing installation time and keeping the facility operational without a lengthy setup process. This turnout locker is a practical, purpose-built storage solution for fire and emergency services facilities that need reliable, organized gear storage. The welded steel frame, powder-coated finish, and full-height design work together to protect equipment and support a fast, consistent response workflow.
