Turnout Locker - 24"W x 18"D x 72"H - 18-Gauge Welded Steel

Product Identification

Product	Turnout Locker - 24"W x 18"D x 72"H - 18-Gauge Welded Steel
StoreMoreStore SKU	SMS-111-V25-WL-TL-K2-247218
Manufacturer Part Number	WL-TL-K2-247218

Technical Specifications

Product Width	24"
Product Depth	18"
Product Height	72"
Warranty	Limited lifetime warranty for the original purchaser while it owns and possesses the product, when installation is completed by a Certified Installer and proof of purchase is provided. Qualifying replacement parts are supplied for the product
Availability	4 - 5 weeks
Material	Steel
Gauge	18-gauge
Color/Finish	Choice of Standard Paint Colors
Assembly	Assembled
Leveling Glides	Included
Upright Slots	1-inch slotted uprights
Product Weight	108 lbs
Country of Origin	USA

Product Overview

Turnout lockers give fire stations and emergency response facilities a dedicated, organized storage point for bulky personal protective gear. This full-height unit stands 72"H and offers a 24"W x 18"D footprint that accommodates turnout coats, pants, boots, helmets, and accessories in one accessible location, keeping gear ready for rapid deployment and off the floor where it

can be damaged or create a tripping hazard.

Built from welded 18-gauge steel with a durable powder-coated finish, this locker arrives fully assembled so it can be placed and put into service without on-site fabrication. Leveling glides allow the unit to sit securely on uneven station floors, and 1-inch slotted uprights provide flexibility for configuring interior components to match the storage needs of individual users.

This locker is well suited for fire stations, EMS facilities, and emergency operations centers where turnout gear must be stored safely, dried between calls, and retrieved quickly. The full 72" height accommodates long coats and hanging gear without folding, while the 18" depth keeps the unit from projecting far into aisles or apparatus bays.

When outfitting a locker room or gear storage area, the assembled delivery reduces installation time and the choice of standard paint colors allows the unit to coordinate with existing station furnishings. Key Features: Welded 18-Gauge Steel Construction: Heavy-gauge welded steel provides a rigid, long-lasting frame that stands up to the demanding environment of an active fire station.

Full-Height 72" Design: The 72" height accommodates full-length turnout coats and hanging gear without folding or compressing, helping gear dry properly and stay ready. Powder-Coated Finish: A durable powder-coat protects the steel surface from moisture, abrasion, and corrosion common in station environments, and is available in a choice of standard paint colors.

1-Inch Slotted Uprights: Slotted uprights allow interior fittings and accessories to be positioned at the heights that work best for each user's gear configuration. Leveling Glides Included: Integrated leveling glides keep the locker stable and plumb on uneven concrete or tile floors without shimming. Ships Fully Assembled: Arrives ready to place, eliminating on-site assembly time and reducing installation labor.

This 24"W x 18"D x 72"H steel turnout locker is a practical, purpose-built solution for storing and organizing personal protective equipment in fire stations and emergency facilities. Welded steel construction, a powder-coated finish, and an assembled delivery make it a straightforward choice for outfitting gear storage areas where reliability and readiness matter.
