Turnout Locker - 24"W x 24"D x 72"H - 18-Gauge Welded Steel

Product Identification

Product	Turnout Locker - 24"W x 24"D x 72"H - 18-Gauge Welded Steel
StoreMoreStore SKU	SMS-111-V25-WL-TL-K2-247224
Manufacturer Part Number	WL-TL-K2-247224

Technical Specifications

Product Width	24"
Product Depth	24"
Product Height	72"
Warranty	Limited lifetime warranty for the original purchaser while it owns and possesses the product, when installation is completed by a Certified Installer and proof of purchase is provided. Qualifying replacement parts are supplied for the product
Availability	4 - 5 weeks
Material	Steel
Gauge	18-gauge
Color/Finish	Choice of Standard Paint Colors
Assembly	Assembled
Leveling Glides	Included
Upright Slots	1-inch slotted uprights
Product Weight	121 lbs
Country of Origin	USA

Product Overview

Turnout lockers give fire stations, EMS facilities, and emergency-response teams a dedicated, organized space to store and access turnout gear quickly when every second counts. This full-height unit stands 72"H and offers a generous 24"W x 24"D footprint that accommodates bulky coats, pants, boots, helmets, and personal equipment without crowding.

The welded 18-gauge steel frame and powder-coated finish deliver lasting durability in demanding station environments, while the assembled delivery means the locker is ready to put to work with minimal setup time. The 1-inch slotted uprights allow interior components to be positioned where they best suit the gear being stored, and the included leveling glides keep the unit stable on uneven station floors.

Available in a choice of standard paint colors, this locker can be coordinated with existing station furnishings or color-coded by crew or shift. This locker is well suited for fire stations, emergency-services facilities, and public-safety departments that need reliable, purpose-built gear storage. The full 72" height provides vertical clearance for hanging coats and pants at full length, reducing wear and keeping gear inspection-ready.

Because the unit ships fully assembled, facilities can place it into service immediately after delivery without requiring on-site assembly labor. The 24" depth keeps gear accessible from the front while fitting neatly along station bay walls or in dedicated gear rooms. Key Features: Welded 18-Gauge Steel Frame: Heavy-gauge welded construction resists the daily wear of a working station environment and supports long-term use without racking or distortion.

Full 72" Height: Provides ample vertical clearance to hang turnout coats and pants at full length, keeping gear properly aired out and ready for inspection. 1-Inch Slotted Uprights: Allow interior fittings and accessories to be positioned at the heights that best suit the specific gear being stored. Powder-Coated Finish: Durable surface coating resists chipping and corrosion, available in a choice of standard paint colors to match station decor or crew identification needs.

Leveling Glides Included: Adjustable glides compensate for uneven floors and keep the locker stable without shimming or modification. Ships Fully Assembled: Arrives ready to place and load, eliminating on-site assembly time and getting gear organized faster. This 24"W x 24"D x 72"H steel turnout locker is a practical, purpose-built solution for emergency-services facilities that need organized, accessible gear storage.

Welded steel construction, a powder-coated finish, and an assembled delivery make it a dependable choice for stations looking to keep turnout gear properly stored and quickly reachable.
