Turnout Locker - 24"W x 24"D x 78"H - 18-Gauge Welded Steel

Product Identification

Product	Turnout Locker - 24"W x 24"D x 78"H - 18-Gauge Welded Steel
StoreMoreStore SKU	SMS-111-V25-WL-TL-K2-247824
Manufacturer Part Number	WL-TL-K2-247824

Technical Specifications

Product Width	24"
Product Depth	24"
Product Height	78"
Warranty	Limited lifetime warranty for the original purchaser while it owns and possesses the product, when installation is completed by a Certified Installer and proof of purchase is provided. Qualifying replacement parts are supplied for the product
Availability	4 - 5 weeks
Material	Steel
Gauge	18-gauge
Color/Finish	Choice of Standard Paint Colors
Assembly	Assembled
Leveling Glides	Included
Upright Slots	1-inch slotted uprights
Product Weight	129 lbs
Country of Origin	USA

Product Overview

Turnout lockers give fire stations and emergency services facilities a dedicated, full-height storage solution for bulky turnout gear, helmets, boots, and related equipment. At 24"W x 24"D x 78"H, this locker provides generous depth to accommodate large gear sets while keeping the floor plan organized and gear ready for rapid deployment. The welded 18-gauge steel frame

delivers lasting structural integrity, and the powder-coated finish resists wear in demanding station environments.

Because the unit ships fully assembled, installation is straightforward and requires no on-site fabrication. Leveling glides allow the locker to sit securely on uneven floors, and 1-inch slotted uprights offer flexibility for configuring interior accessories to match the way your crew stores gear. This locker fits naturally into apparatus bays, gear rooms, and locker corridors where space planning calls for a full-height, deep-body unit.

The 24-inch depth accommodates bulky protective clothing without forcing gear to be compressed or folded, which helps extend the life of the equipment stored inside. Available in a choice of standard paint colors, it can be coordinated with existing station furnishings or color-coded by crew assignment. Key Features: Welded 18-Gauge Steel Frame: Heavy-gauge welded construction provides a rigid, long-lasting structure suited to the daily demands of fire station and emergency services use.

Full-Height 78" Profile: The 78-inch height accommodates hanging turnout coats, pants, and tall boots without folding or compressing gear. 24-Inch Depth: Generous 24-inch depth handles bulky protective equipment and allows gear to be stored fully open and ready for quick access. Powder-Coated Finish: A durable powder-coat surface resists scratches and corrosion, maintaining appearance in high-traffic station environments.

Ships Fully Assembled: Arrives ready to position and level, reducing installation time and effort on site. Leveling Glides Included: Adjustable leveling glides keep the locker stable and plumb on uneven concrete or tile floors. This 24"W x 24"D x 78"H turnout locker is a practical, durable choice for facilities that need reliable, full-height gear storage built from welded steel.

The assembled delivery, included leveling glides, and choice of standard paint colors make it straightforward to deploy in new or existing station layouts.
