

Product Specification Sheet

Turnout Locker - 18" W x 18" D x 66" H - Industrial Red Powder-Coated Steel

Product Identification

Product	Turnout Locker - 18" W x 18" D x 66" H - Industrial Red Powder-Coated Steel
Manufacturer Part Number	WL-TL-K2-186618

Technical Specifications

Product Width	18"
Product Depth	18"
Product Height	66"
Warranty	Limited lifetime warranty for the original purchaser while it owns and possesses the product, when installation is completed by a Certified Installer and proof of purchase is provided. Qualifying replacement parts are supplied for the product
Availability	Ships in 20-25 Business Days
Material	Steel
Gauge	18-gauge
Color/Finish	Industrial Red (T27) Powder-Coated Finish
Assembly	Assembled
Product Weight	88 lbs
Country of Origin	USA

Product Overview

A turnout locker built for demanding storage environments where gear must be organized and accessible. Standing 66" tall with an 18" x 18" footprint, this locker gives firefighters, emergency responders, and facility managers a dedicated vertical storage solution for turnout gear and personal equipment. The welded 18-gauge steel frame delivers solid, lasting construction, while the Industrial Red (T27) powder-coated finish resists wear and keeps the unit looking sharp in high-traffic areas.

Arriving fully assembled, this locker is ready to put to work without on-site assembly. The 1-inch slotted uprights allow for flexible interior configuration, and leveling glides keep the unit stable on uneven floors - a practical detail that matters in real station and facility environments. This locker fits naturally into fire stations, emergency services facilities, and industrial workplaces where turnout gear needs a consistent, organized home.

The compact 18" x 18" footprint makes it easy to line up multiple units side by side without consuming excessive floor space, supporting a clean and efficient gear room layout. Because it ships fully assembled, setup time is minimal and the locker can be placed into service immediately upon delivery. Key Features: 18-Gauge Welded Steel Frame: Heavy-gauge steel construction provides a rigid, durable frame that holds up to the demands of daily gear storage.

1-Inch Slotted Uprights: Adjustable interior configuration lets you customize the locker layout to fit the specific gear or equipment being stored. Leveling Glides: Built-in glides compensate for uneven floors, keeping the locker stable and upright without shimming or modification. Industrial Red Powder-Coated Finish: The T27 powder-coat finish resists chipping and corrosion while providing a consistent, professional appearance in station environments.

Fully Assembled: Ships ready to use - no assembly required, reducing setup time and getting gear organized faster. Compact Footprint: At 18" W x 18" D, the locker can be arranged in rows to maximize gear room capacity without wasting floor space. This turnout locker is a practical, well-built storage solution for facilities that need reliable, organized gear storage in a compact vertical format.

The steel construction, powder-coated finish, and fully assembled delivery make it a straightforward choice for fire stations, emergency services departments, and industrial facilities managing personal protective equipment.
