

Product Specification Sheet

Open Weapon Rack - 42" W x 15" D x 83" H - Holds 18 Rifles with 2 Storage Bins

Product Identification

Product	Open Weapon Rack - 42" W x 15" D x 83" H - Holds 18 Rifles with 2 Storage Bins
StoreMoreStore SKU	SMS-911-V25-AWR83-18R2B
Manufacturer Part Number	AWR83-18R2B

Technical Specifications

Product Width	42"
Product Depth	15"
Rifle Capacity	18 Rifles
Product Height	83"
Warranty	Lifetime warranty
Availability	4 - 5 weeks
Material	Steel
Gauge	16 and 18 Gauge Steel
Shelf Adjustment	1" Centers
Color/Finish	Choice of 15 Standard Paint Colors
Included Components	2 Storage Bins, Leveling Glides
Assembly	Unassembled
Product Weight	165 lbs
Country of Origin	USA

Product Overview

This open weapon rack provides organized, accessible storage for up to 18 rifles in armories, law enforcement facilities, military installations, and other controlled-access weapon rooms. Two vertically arranged storage bins on the side provide convenient space for related equipment and supplies within the same upright unit. Measuring 42" W x 15" D x 83" H, the rack consolidates

long-gun and accessory storage while making efficient use of available floor space.

Because it provides open rather than enclosed storage, the rack is intended for installation within a secured room or facility. Constructed from welded 16 and 18 gauge steel, the rack is built for regular use in demanding weapon storage environments. Storage components can be positioned on 1" vertical centers, providing flexibility for arranging the included components. The rack includes a base and leveling glides and can be mounted back-to-back with another unit or bolted to wall studs.

Security screw holes in the back panels help secure the installed components. A choice of 15 paint colors allows the finish to coordinate with other equipment in the facility. The rack ships unassembled and requires on-site assembly. Key Features: 18-Rifle Capacity: Organizes up to 18 rifles in one upright storage unit. 2 Storage Bins: Two included bins provide convenient storage for related equipment and supplies.

Open-Access Design: Supports clear visibility, inventory checks, and direct access inside a controlled-access weapon room. Welded Steel Construction: Manufactured from 16 and 18 gauge steel for durability in armories and other demanding facilities. 1" Vertical Centers: Allow storage components to be positioned in 1" increments for configuration flexibility. Multiple Installation Options: Can be mounted back-to-back with another rack or bolted to wall studs.

Component Security Screw Holes: Back panels include holes for securing installed storage components. Leveling Glides: Help stabilize the rack on floors with minor surface irregularities. Choice of 15 Paint Colors: Offers multiple finish options for coordinating with the surrounding facility. Unassembled Shipment: Ships unassembled and requires on-site assembly. Designed for secured armories and controlled-access equipment rooms, this open weapon rack combines storage for 18 rifles with two bins for related items.

Its open layout, welded steel construction, narrow footprint, and flexible installation options provide an efficient way to keep long guns and equipment organized and ready for inventory or issue. The rack is made in the USA.
