

Product Specification Sheet

Open Weapon Rack - 42" W x 15" D x 83" H - Holds 24 Rifles

Product Identification

Product	Open Weapon Rack - 42" W x 15" D x 83" H - Holds 24 Rifles
StoreMoreStore SKU	SMS-911-V25-AWR83-24R
Manufacturer Part Number	AWR83-24R

Technical Specifications

Product Width	42"
Capacity	24 Rifles
Product Depth	15"
Product Height	83"
Warranty	Lifetime warranty
Availability	4 - 5 weeks
Material	Steel
Gauge	16 and 18 Gauge Steel
Shelf Adjustment	1" centers
Color/Finish	Choice of 15 Standard Paint Colors
Assembly	Unassembled
Leveling Glides	Included
Product Weight	200 lbs
Country of Origin	USA

Product Overview

This open weapon rack provides organized, accessible storage for up to 24 rifles in armories, law enforcement facilities, military installations, and other controlled-access weapon rooms. Measuring 42" W x 15" D x 83" H, its tall, narrow profile consolidates long-gun storage while making efficient use of available floor space. Because this is an open rack rather than a locking cabinet,

it is intended for installation within a secured room or facility.

Constructed from welded 16 and 18 gauge steel, the rack is built for regular use in demanding weapon storage environments. Storage components mount on 1" centers, providing flexibility for component placement. The rack includes a base and leveling glides and can be installed back-to-back with another unit or bolted to wall studs. Security screw holes in the back panels help secure the installed components. A choice of 15 paint colors allows the finish to coordinate with other equipment in the facility.

The rack ships unassembled and requires on-site assembly. Key Features: 24-Rifle Capacity: Organizes up to 24 rifles in one upright storage unit. Open-Access Design: Provides clear visibility and direct access to stored rifles inside a controlled-access weapon room. Welded Steel Construction: Manufactured from 16 and 18 gauge steel for durability in armories and other demanding facilities. 1" Adjustable Centers: Allow storage components to be positioned in 1" increments for configuration flexibility.

Multiple Installation Options: Can be mounted back-to-back with another rack or bolted to wall studs. Component Security Screw Holes: Back panels include holes for securing installed storage components. Leveling Glides: Help stabilize the rack on floors with minor surface irregularities. Choice of 15 Paint Colors: Offers multiple finish options for coordinating with the surrounding facility. Unassembled Shipment: Ships unassembled and requires on-site assembly.

Designed for secured armories and controlled-access equipment rooms, this 24-rifle open weapon rack combines high-capacity storage with direct access and configuration flexibility. Its welded steel construction, narrow footprint, and multiple installation options make it a practical solution for keeping rifles organized and ready for inventory or issue.
