Technical Specifications

Product Width	30"
Product Depth	18"
Warranty	Manufacturers Limited Lifetime Warranty
Product Height	88.25"
Material	Solid Steel
Weight	121

Product Overview

Tactical teams need reliable, purpose-built storage that keeps gear organized, protected, and ready for rapid deployment. This solid steel gear locker is built for SWAT and tactical unit environments where secure, dedicated storage for each officer's equipment is essential. At 30" W x 18" D x 88.25" H, the starter unit provides a full-height locker footprint that accommodates bulky tactical gear without the clutter of improvised storage solutions.

The solid steel construction delivers the durability that demanding public safety environments require, standing up to daily use in armories, ready rooms, and equipment staging areas where gear must be accessible and accounted for at all times. This starter locker is the foundational unit in a configurable gear locker system, making it the right choice when outfitting a new space or expanding an existing installation one section at a time.

Its 30" width provides meaningful per-officer storage capacity, while the 18" depth keeps the locker's footprint manageable in tighter facility layouts. The full 88.25" height makes use of vertical space, freeing up floor area for other operational needs. Starter units are typically paired with add-on sections to build out a complete row of individual gear lockers suited to the size of the team.

Key Features: Solid Steel Construction: Built from solid steel for lasting durability in high-demand law enforcement and tactical storage environments. Full-Height Design: At 88.25" H, the locker maximizes vertical storage space, keeping bulky tactical gear contained and off the floor. 30" Width: Provides generous per-officer storage capacity for helmets, vests, weapons accessories, and other tactical equipment.

18" Depth: A manageable footprint that fits within the space constraints of armories, ready rooms, and equipment staging areas. **Starter Configuration:** Serves as the base unit for a scalable locker row, allowing facilities to expand storage capacity by adding compatible sections as team size grows. This solid steel starter gear locker is a practical, space-efficient solution for

SWAT teams and tactical units that need organized, dedicated storage for each officer's equipment.

Its full-height, 30" W x 18" D x 88.25" H profile makes it well suited to armories and ready rooms where reliable gear access and accountability matter most.
