Technical Specifications

Product Width	36"
Product Depth	18"
Warranty	Manufacturers Limited Lifetime Warranty
Product Height	88.25"
Material	Solid Steel
Weight	85

Product Overview

This solid steel gear locker is built for SWAT teams and tactical law enforcement units that need secure, dedicated storage for duty gear, equipment, and personal items. Standing 88.25" tall and measuring 36" W x 18" D, it provides a full-height storage column that keeps gear organized, protected, and ready for rapid deployment.

As an Adder unit, this locker is designed to expand an existing locker installation, allowing departments to grow their storage capacity while maintaining a consistent, uniform appearance across the locker run. The Adder configuration connects to a previously installed starter or base unit, making it the right choice when a facility already has a compatible locker system in place and needs additional individual storage bays.

The solid steel construction supports the demanding conditions of a tactical operations environment, where durability and long-term reliability are essential. At 36" wide, each unit provides a generous storage footprint suited to bulky tactical gear, vests, helmets, and related equipment. Key Features: Adder Unit Configuration: Designed to attach to an existing locker installation, letting you expand storage capacity without replacing your current setup.

Full-Height Design: At 88.25" tall, the locker accommodates full-length gear, long garments, and bulky tactical equipment in a single organized bay. Generous 36" Width: Wider than standard lockers, providing ample room for vests, helmets, packs, and other large-format tactical items. Solid Steel Construction: Built from solid steel for the durability and structural integrity required in high-use public safety and law enforcement environments.

18" Depth: Provides enough clearance for layered gear storage while keeping the overall locker footprint manageable in tight locker room spaces. This gear locker is a practical solution for SWAT units, tactical teams, and law enforcement facilities that need reliable, full-height storage for duty equipment. The Adder unit format makes it straightforward to scale up an existing installation bay by bay as staffing and storage needs grow.
