Technical Specifications

Product Width	24"
Product Depth	24"
Warranty	Manufacturers Limited Lifetime Warranty
Product Height	88.25"
Material	Solid Steel
Weight	79

Product Overview

This solid steel gear locker is built for SWAT teams and tactical law enforcement units that need secure, dedicated storage for duty gear, equipment, and personal items. At 24" W x 24" D x 88.25" H, it provides a full-height storage column with enough depth to accommodate bulky tactical gear that standard lockers cannot handle.

The Adder configuration is designed to extend an existing locker run, allowing departments to grow their storage capacity in a consistent, space-efficient line without the footprint of a standalone starter unit. This locker fits naturally into armories, locker rooms, and equipment staging areas where organized, individual gear storage is a daily operational requirement. The deep 24" cabinet depth accommodates helmets, body armor, and other oversized tactical items that would not fit in a conventional locker.

The solid steel construction supports the durability demands of a high-use public safety environment, and the adder format keeps the installation footprint compact when multiple officers share a common storage wall. Key Features: Full-Height Cabinet: At 88.25" tall, this locker maximizes vertical storage space so gear can be hung, stacked, or organized from floor to near-ceiling height.

Deep 24" Cabinet Depth: The 24" depth accommodates helmets, body armor, and other bulky tactical equipment that standard-depth lockers cannot fit. Solid Steel Construction: Built from solid steel for the durability and security demands of law enforcement and public safety storage environments. Adder Unit Configuration: Designed to attach to an existing locker run, making it straightforward to expand storage capacity without requiring a new starter unit.

This solid steel gear locker is a practical solution for SWAT and tactical teams that need reliable, full-height storage for duty equipment. The 24" W x 24" D x 88.25" H adder unit integrates cleanly into an existing locker installation, helping departments keep gear organized, accessible, and securely stored.
