

Product Specification Sheet

SWAT Team Locker for Gear - 30" W x 24" D x 88.25" H - Adder Unit - Solid Steel

Product Identification

Product	SWAT Team Locker for Gear - 30" W x 24" D x 88.25" H - Adder Unit - Solid Steel
StoreMoreStore SKU	SMS-882430-TACT-A

Technical Specifications

Product Width	30"
Product Depth	24"
Warranty	Manufacturers Limited Lifetime Warranty
Product Height	88.25"
Material	Solid Steel
Weight	93

Product Overview

Keeping tactical gear organized, secure, and ready for deployment is a critical challenge for SWAT teams and law enforcement units. This solid steel gear locker is purpose-built for that environment, providing a dedicated storage solution that helps officers store and access their equipment efficiently. At 30" W x 24" D x 88.25" H, this full-height unit offers substantial storage capacity for bulky tactical gear, helping teams maintain order in armories, locker rooms, and equipment staging areas.

This is the adder unit configuration, designed to expand an existing locker installation by adding storage capacity alongside a starter unit. The adder format allows facilities to grow their gear storage footprint in a consistent, space-efficient way without duplicating structural components. The adder unit fits into tactical storage layouts where multiple officers share a common equipment room or where a department needs to scale up storage for a growing team.

Its full-height solid steel construction supports the demands of a working public safety environment, and the 30" width provides a practical per-officer storage bay. Facilities planners and equipment managers specifying locker systems for SWAT, tactical response, or similar units will find this adder configuration a straightforward way to extend an existing row of gear lockers.

Key Features: **Solid Steel Construction:** Built from solid steel for durability in demanding law enforcement and public safety storage environments. **Full-Height Design:** At 88.25" tall, the locker provides generous vertical storage space suited to full-length tactical gear and equipment. **30" Width:** A practical bay width that accommodates individual officer gear assignments within a shared equipment room layout.

24" Depth: Sufficient depth to store bulky tactical items while keeping the unit's overall footprint manageable in tight spaces. **Adder Configuration:** Designed to pair with a starter unit, allowing storage capacity to be expanded in a consistent, modular way as team size or gear inventory grows. This solid steel SWAT gear locker adder unit is a practical choice for law enforcement facilities that need to expand organized, dedicated storage for tactical equipment.

Its full-height, 30" W x 24" D x 88.25" H footprint and solid steel build make it a reliable addition to any tactical gear storage system.
