SWAT Team Gear Locker - 36" W x 24" D x 88.25" H - Solid Steel - Starter

Product Identification

Product	SWAT Team Gear Locker - 36" W x 24" D x 88.25" H - Solid Steel - Starter
StoreMoreStore SKU	SMS-882436-TACT-S

Technical Specifications

Product Width	36"
Product Depth	24"
Warranty	Manufacturers Limited Lifetime Warranty
Product Height	88.25"
Material	Solid Steel
Weight	168

Product Overview

Keeping tactical gear organized, secure, and ready for rapid deployment is a critical challenge for SWAT teams and law enforcement units. This solid steel gear locker is built to meet that need, providing a full-height storage solution that accommodates the bulky, heavy equipment carried by tactical personnel. At 36" W x 24" D x 88.25" H, the starter unit delivers a substantial storage footprint that fits into locker rooms, armories, and equipment bays without consuming excessive floor space.

The solid steel construction supports the demands of a high-use public safety environment, where durability and long-term reliability matter. This starter configuration is designed to work as a standalone unit or as the beginning of a larger gear storage system, making it a practical choice for departments planning phased buildouts or expanding existing locker rooms.

This locker is suited for SWAT teams, tactical units, and law enforcement facilities that need dedicated, full-height storage for gear, uniforms, and equipment. The 24" depth provides meaningful interior clearance for larger items, while the 88.25" height maximizes vertical storage capacity within a standard ceiling height. As a starter unit, it is the foundational piece for a coordinated row or bank of gear lockers, allowing facilities to add compatible units as needs grow.

Departments evaluating a complete locker room buildout should consider the starter and add-on configurations together to plan total capacity. **Key Features:** Solid Steel Construction: Built from solid steel for lasting durability in demanding law enforcement and tactical environments. Full-Height Design: At 88.25" tall, the locker maximizes vertical storage space for full-length gear, uniforms, and equipment.

Generous Depth: The 24" depth accommodates bulky tactical gear and larger items that standard lockers cannot fit. **Wide 36" Opening:** The 36" width provides ample access and interior space for organizing multiple gear items side by side. **Starter Configuration:** Designed as the base unit for a coordinated locker system, supporting phased expansion as storage needs grow. This solid steel gear locker gives tactical teams a reliable, full-height storage solution sized for the real demands of law

enforcement equipment.

The starter configuration makes it straightforward to begin a well-organized gear storage system and expand it over time to match the size of the unit it serves.
