Technical Specifications

Product Width	36"
Product Depth	24"
Warranty	Manufacturers Limited Lifetime Warranty
Product Height	88.25"
Material	Solid Steel
Weight	109

Product Overview

Designed for law enforcement and tactical teams that need secure, dedicated storage for bulky gear and equipment, this solid steel gear locker provides a full-height storage solution built to handle the demands of a working SWAT or tactical unit. At 36" W x 24" D x 88.25" H, it offers generous interior space to accommodate helmets, body armor, duty bags, and other mission-critical items that standard lockers cannot accommodate.

The adder unit configuration allows this locker to be joined to a starter or adjacent unit, making it straightforward to expand a gear storage bay as team size or equipment needs grow without sacrificing floor space efficiency. This locker fits naturally into armories, equipment rooms, locker rooms, and staging areas where tactical teams need organized, individual gear storage.

The solid steel construction supports the durability requirements of high-use public safety facilities, and the full-height profile keeps large items upright and accessible. Choosing an adder unit lets planners build out a continuous locker run that keeps the storage area clean and organized while maximizing the number of stations in a given footprint. Key Features: Full-Height Solid Steel Construction: Built from solid steel for lasting durability in demanding law enforcement and tactical environments.

Generous 36" W x 24" D x 88.25" H Footprint: Wide, deep, and tall interior accommodates helmets, body armor, bags, and oversized tactical gear that standard lockers cannot fit. Adder Unit Configuration: Designed to connect to adjacent units, allowing a storage bay to be expanded incrementally as team or equipment needs change. Purpose-Built for Tactical Gear Storage: Sized and constructed specifically for SWAT and tactical team applications where secure, organized gear access matters.

This solid steel gear locker is a practical choice for agencies equipping a tactical team storage area. The full-height adder unit pairs with compatible starter and additional adder units to create a scalable, organized locker run suited to armories, equipment rooms, and staging facilities.
