Technical Specifications

Product Width	24"
Product Depth	30"
Warranty	Manufacturers Limited Lifetime Warranty
Product Height	88.25"
Material	Solid Steel
Weight	146

Product Overview

Purpose-built for law enforcement and tactical teams, this solid steel gear locker gives SWAT and public safety personnel a dedicated, secure place to store and organize full-size tactical equipment. At 24" W x 30" D x 88.25" H, the locker provides substantial depth to accommodate bulky gear, helmets, body armor, and long items that standard lockers cannot handle.

The starter configuration makes it a practical entry point for outfitting a new locker room or expanding an existing one without committing to a full bank upfront. Solid steel construction means the locker holds up to the daily demands of a working tactical environment, resisting dents, impacts, and wear that lighter materials cannot withstand.

This locker fits naturally into dedicated gear rooms, armories, and locker bays where officers need reliable, organized access to their equipment before and after deployment. The 30" depth is a key differentiator for teams carrying large tactical kits, allowing gear to be stored fully inside rather than compressed or left hanging out.

The starter unit is designed to work as a standalone locker or as the beginning of a coordinated row, making it a flexible choice for facilities planning phased buildouts or working within a defined floor footprint. Key Features: Solid Steel Construction: Heavy-gauge solid steel body resists impact and daily wear in demanding tactical environments, providing long-term durability.

30" Deep Cabinet: Extra depth accommodates full-size tactical gear, body armor, helmets, and long items that standard-depth lockers cannot store properly. Full-Height Design at 88.25": Floor-to-near-ceiling height maximizes vertical storage space, keeping gear organized and off the floor. 24" Wide Starter Unit: Compact width fits individual officer assignments while the starter configuration supports standalone use or phased row expansion.

Manufacturer's Limited Lifetime Warranty: Backed by a manufacturer's limited lifetime warranty for long-term confidence in the investment. This solid steel tactical gear locker is a well-suited solution for law enforcement facilities, armories, and public

safety locker rooms that need reliable, full-height storage for large or heavy equipment. The 24" W x 30" D x 88.25" H starter unit provides a practical foundation for organized, secure gear management.
