## Product Overview

This solid steel tactical gear locker gives law enforcement and public safety teams a dedicated, secure place to store and organize SWAT gear, keeping equipment ready and accounted for when it matters most. At 24" W x 30" D x 88.25" H, the locker provides a full-height footprint that accommodates bulky tactical items while keeping the storage area orderly and efficient.

This listing is for the adder unit, which is designed to pair with a starter unit to build out a run of lockers across a locker room or equipment bay. Adding adder units lets facilities scale storage capacity to match team size without sacrificing floor space efficiency. The adder configuration shares a side panel with the adjacent starter unit, making it the practical choice when expanding an existing locker installation or planning a new multi-unit row.

The solid steel construction supports the demanding conditions of a public safety environment, where lockers must hold up to daily use and protect gear reliably over time. At nearly 88.25" tall, each unit makes full use of vertical space, freeing up floor area for other operational needs. Key Features: Full-Height Design: At 88.25" H, the locker maximizes vertical storage space, accommodating tall or bulky tactical gear without requiring additional floor area.

**Solid Steel Construction:** Built from solid steel for durability in high-use public safety and law enforcement environments. **Adder Unit Configuration:** Designed to connect to a starter unit, allowing facilities to expand locker capacity in a continuous, space-efficient row. **Generous Depth:** The 30" depth provides ample room for tactical vests, helmets, and other large gear items that standard lockers cannot accommodate.

This solid steel SWAT gear locker adder unit is a practical solution for law enforcement facilities that need to expand organized, secure storage for tactical equipment. Its full-height, deep-body design handles the storage demands of a working SWAT team, and the adder format makes it straightforward to build out a complete locker row sized to your team.
