Warranty	Manufacturers Limited Lifetime Warranty
Product Height	88.25"
Material	Solid Steel
Weight	110

Product Overview

When tactical teams need a reliable place to store and protect their gear between deployments, this solid steel SWAT team locker delivers the structure and security that demanding public safety environments require. Built as a starter unit at 30" W x 30" D x 88.25" H, it provides a full-height storage solution that keeps gear organized, protected, and ready for rapid deployment.

The solid steel construction stands up to the rigors of daily use in locker rooms, armories, and equipment staging areas where durability is non-negotiable. As a starter configuration, this locker is designed to anchor a run of units, making it a practical foundation for departments planning a coordinated gear storage layout. This locker fits naturally into law enforcement armories, tactical team ready rooms, and public safety facilities where organized, individual gear storage is essential.

The full-height 88.25" profile maximizes vertical space, allowing bulky tactical equipment, body armor, helmets, and duty gear to be stored in a single dedicated compartment. Departments outfitting a new facility or expanding an existing locker room can use this starter unit as the beginning of a larger, coordinated storage system. Key Features: Solid Steel Construction: Built from solid steel for long-term durability in high-demand tactical and public safety environments.

Full-Height Profile: At 88.25" H, the locker accommodates bulky tactical gear, body armor, and equipment that standard lockers cannot fit. 30" W x 30" D Footprint: The generous width and depth provide ample interior space for complete gear sets, reducing the need for multiple storage locations. Starter Configuration: Designed as the anchor unit in a multi-locker run, supporting a coordinated, expandable storage layout for teams of any size.

Manufacturer's Limited Lifetime Warranty: Backed by a manufacturer's limited lifetime warranty for long-term confidence in the investment. This solid steel gear locker is a purpose-built storage solution for SWAT teams and tactical units that need organized, secure, and durable equipment storage.

The starter configuration makes it the right choice for departments building out a new locker room or adding capacity to an existing one, with a full-height footprint that keeps all essential gear in one place and ready when it matters most.
