Technical Specifications

Product Width	36"
Product Depth	30"
Warranty	Manufacturers Limited Lifetime Warranty
Product Height	88.25"
Material	Solid Steel
Weight	130

Product Overview

This solid steel gear locker is built for SWAT teams and tactical law enforcement units that need reliable, dedicated storage for bulky equipment and personal gear. At 36" W x 30" D x 88.25" H, the starter unit provides a full-height storage column that keeps gear organized, protected, and ready for rapid deployment.

The starter configuration is the entry point for a locker system designed around the demands of tactical operations, giving teams a practical way to assign individual storage space in armories, ready rooms, and equipment staging areas. This locker fits naturally into law enforcement facilities where gear accountability and space efficiency matter.

The 30" depth accommodates bulky tactical items that standard lockers cannot handle, while the 88.25" height maximizes vertical storage in rooms where floor space is limited. The solid steel construction supports the durability requirements of high-use public safety environments. As a starter unit, it is intended to anchor a locker run and can be paired with add-on units to expand storage capacity as team size or equipment needs grow.

Key Features: Full-Height Design: At 88.25" H, this locker maximizes vertical storage space so more gear fits within a smaller footprint. Deep 30" Depth: The 30" depth accommodates bulky tactical gear, helmets, body armor, and other equipment that shallower lockers cannot fit. Solid Steel Construction: Built from solid steel for the durability and security demands of active law enforcement and public safety facilities.

36" Width: The 36" wide opening provides generous individual storage space for a full complement of personal tactical equipment. Starter Unit Configuration: Designed as the anchor of a locker run, this starter unit supports system expansion with compatible add-on units. This gear locker is a practical storage solution for SWAT teams and tactical units that need secure, organized, and accessible space for their equipment.

The solid steel starter unit delivers the capacity and durability required in demanding public safety environments.
