

ROBOTIC ARMS

STORAGE AND TRANSPORTATION

PRECISION PROTECTION FOR DELICATE EQUIPMENT

Keep all your Robotic Arms Instruments safe and secure from CSSD/SPD storage to the OR. This closed-loop system—racks, a closed secure cart for storage, and an open cart for transportation—ensures protection, organization, and efficient transport, improving workflow and reducing handling risks

✓ DEDICATED FIT

Extra-large trays designed specifically to fit Robotics Arm instruments. Can be divided in four

✓ SAFE STORAGE

Protect valuable instruments with telescopic slides and locks—minimizing damage and reducing replacement costs

✓ PREMIUM QUALITY

The same Salus and Apollo you know and trust—now adapted to fit 80x60 modules. Salus features a new wider frame for enhanced stability, while Apollo Flex is upgraded with 12mm HPL top and bottom panels for greater durability and performance
