

2-Level Vertical Lift Storage Stacker for Crash & Order-Picking Carts

Model SMS-889-V01-SSG-UL4F-SPL-2CC-CRASH

Application: Designed for hospitals, central-supply departments, warehouses, distribution centers, and fulfillment operations that need accessible vertical cart storage.

This 2-level model provides 54.5-inch clear openings and a 1,000-pound capacity per platform. Verify actual equipment dimensions, weights, quantity, workflow, and site conditions before ordering.

Model Specifications

SMS SKU	SMS-889-V01-SSG-UL4F-SPL-2CC-CRASH
Application	Crash carts and order-picking carts
Storage levels	2
Clear opening per level	54.5 in.
Overall dimensions	105 in. W x 55 in. D x 127 in. H
Usable platform	96.5 in. W x 47 in. D
Capacity	1,000 lb maximum per platform
Electrical requirement	220V, single-phase, 10 Amp
Estimated planning weight	4,400 lb; confirm for approved project
Loading arrangement	Front load; field convertible to side load
Level adjustment	Adjustable openings; additional levels can be configured during project planning
Material / finish	Powder-coated steel / gray antimicrobial finish
Assembly	Ships unassembled; professional installation required
Country of origin	USA

Safety and Available Project Options

Published system features include dual floor safety sensors, a safety light curtain, a keyed lockout emergency stop, color-coded controls, and UL-certified electronics. Available project options include long side panels, short side panels, wheel chocks, loading-ramp configurations, a roll-down door, and a seismic package.

Important: This document is a product specification summary, not an approved engineering drawing or installation manual. Final equipment fit, structural and anchoring requirements, code compliance, electrical readiness, delivery, and installation must be confirmed for the approved project.
