

# 4-Level Vertical Lift Storage Stacker for Wheelchairs & Mobility Scooters

Model SMS-889-V01-SSG-UL6F-SPL-4WC

**Application:** Designed for healthcare, rehabilitation, long-term-care, equipment-rental, and mobility-service facilities that need to organize wheeled mobility equipment.

This 4-level model provides 41-inch clear openings and a 1,000-pound capacity per platform. Verify actual equipment dimensions, weights, quantity, workflow, and site conditions before ordering.

## Model Specifications

|                                  |                                                       |
|----------------------------------|-------------------------------------------------------|
| <b>SMS SKU</b>                   | SMS-889-V01-SSG-UL6F-SPL-4WC                          |
| <b>Application</b>               | Wheelchairs, electric scooters, and mobility scooters |
| <b>Storage levels</b>            | 4                                                     |
| <b>Clear opening per level</b>   | 41 in.                                                |
| <b>Overall dimensions</b>        | 105 in. W x 55 in. D x 184 in. H                      |
| <b>Usable platform</b>           | 96.5 in. W x 47 in. D                                 |
| <b>Capacity</b>                  | 1,000 lb maximum per platform                         |
| <b>Electrical requirement</b>    | 220V, single-phase, 10 Amp                            |
| <b>Estimated planning weight</b> | 6,200 lb; confirm for approved project                |
| <b>Loading arrangement</b>       | Front load; field convertible to side load            |
| <b>Level adjustment</b>          | Storage levels adjust in 3-inch increments            |
| <b>Material / finish</b>         | Powder-coated steel / gray antimicrobial finish       |
| <b>Assembly</b>                  | Ships unassembled; professional installation required |
| <b>Country of origin</b>         | USA                                                   |

## Safety and Available Project Options

Published system features include dual floor safety sensors, a safety light curtain, a keyed lockout emergency stop, color-coded controls, and UL-certified electronics. Available project options include long side panels, short side panels, wheel chocks, loading-ramp configurations, a roll-down door, and a seismic package.

**Important:** This document is a product specification summary, not an approved engineering drawing or installation manual. Final equipment fit, structural and anchoring requirements, code compliance, electrical readiness, delivery, and installation must be confirmed for the approved project.
